How Can **Business Innovation** Help Unify a Complex ERP Landscape in Just Four Months?
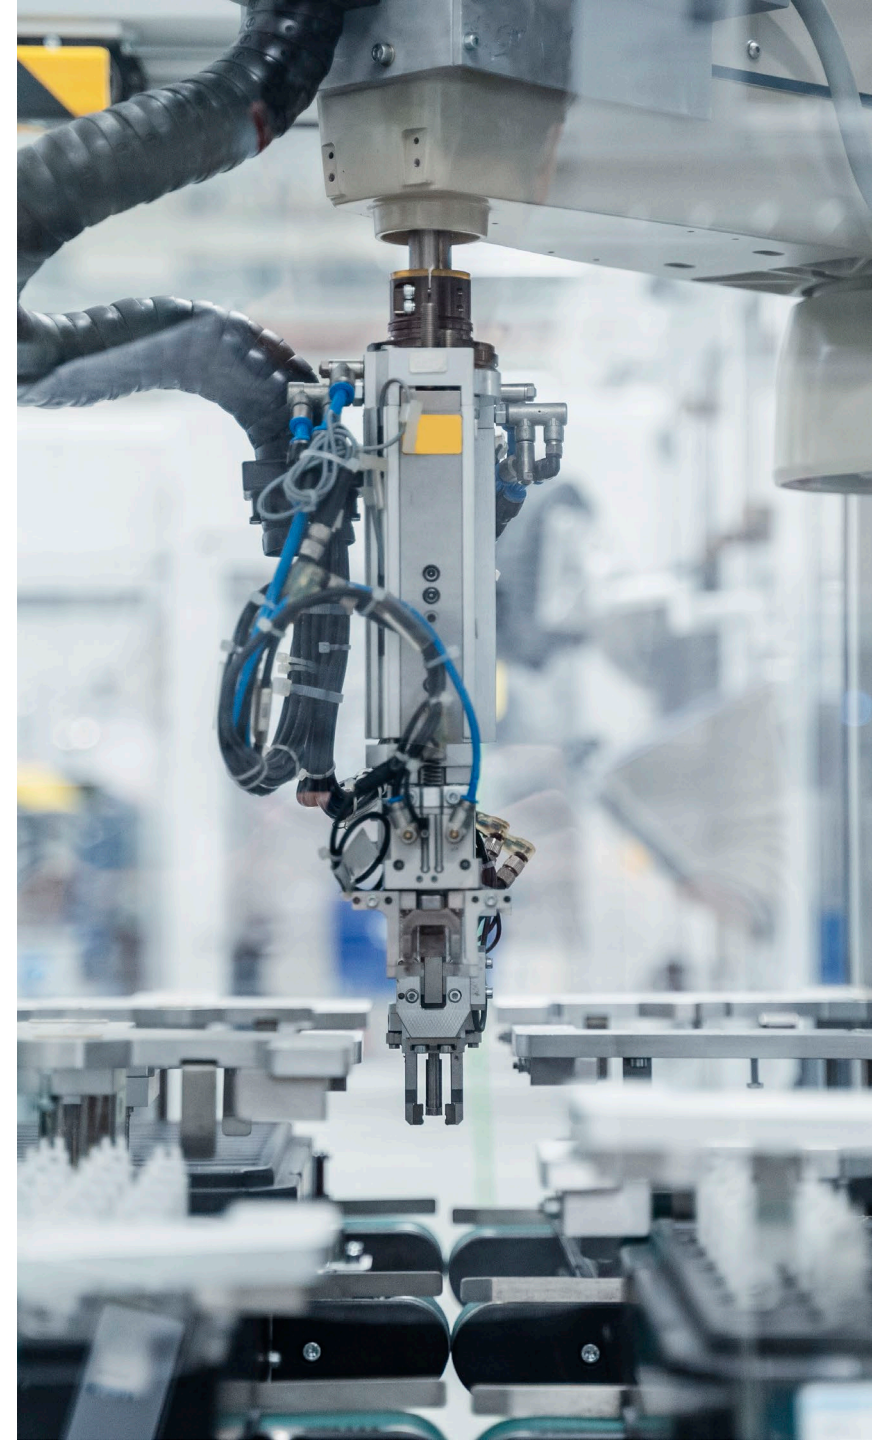

Improving processes across **10 locations** under a tight deadline

Innovative offerings from flue gas extraction and ventilation system leader M&G Group B.V. help customers transition to a cleaner future, including through hybrid solutions such as combining a central heating boiler with a heat pump. Numerous international acquisitions meant the plants producing these offerings effectively operated as individual companies with their own ERP setups and processes. In setting out to harmonize this environment, M&G Group faced a major challenge: it had to complete the transformation before the launch of a new integrated factory and start of peak season. M&G Group needed assistance to **accelerate and optimize this critical implementation**.

Standardizing Processes on an Integrated ERP Solution with **RISE with SAP**

Before: Challenges and Opportunities
- Harmonize fragmented ERP approaches and improve processes in plants across Europe to enable the company to take a leadership role in the global energy transition
- Speedily transition from the existing SAP® ERP application to an intelligent infrastructure for ERP to enable a new unified system before the onset of peak business season

Why SAP, ITvisors B.V., and Aiden B.V.
- SAP S/4HANA® Cloud, offering broad functionality and the ability to support challenging planning, production-integration, and data-volume needs
- RISE with SAP® solution, supporting fast time to value and accelerated digital transformation and providing hosting and licensing services from one party in a future-proof manner
- SAP partners ITvisors for business transformation support and Aiden for deep experience of SAP S/4HANA Cloud migration

After: Value-Driven Results
- A stable foundation for growth aided by a consistent ERP landscape, optimized processes, and use of best practices from SAP as standard as well as a clear road map for using SAP S/4HANA Cloud to support the company's vision to become a leader in energy transition
- Support for the successful and smooth opening of a new factory merging the operations of two plants
- Improved user experience through replacement of customization with SAP Fiori® apps, such as in order-to-cash processes

"Choosing RISE with SAP helped us **migrate our ERP environment in one go** and optimize it later – in line with our 'run first, then improve' philosophy. We can now start to make optimal use of the power of SAP S/4HANA Cloud."

Eric Pots, IT Application Manager, M&G Group B.V.
